

[illegible]

Many ologists have been
 working on the problem of
 the origin of life. It is
 believed that life began
 in a warm, shallow pool
 of water. The first
 organisms were simple
 cells. They grew and
 reproduced. Over time,
 they became more
 complex. Some of them
 became plants. Some
 became animals. Some
 became humans. The
 study of the origin of
 life is called paleontology.
 It is a very interesting
 and important field of
 study.

Bijlagen bij het Belgisch Staatsblad - 16/11/2004- Annexes du Moniteur belge

Op de laatste blz. van <u>Lijk R</u> vermelden	Recto Naam en hoedanigheid van de instrumenterende notaris, hetzij van de perso(o)n(en) bevoegd de rechtspersoon ten aanzien van de(den) te vertegenwoordigen
	Verso Naam en handtekening
